Instructional Resources

Instructional Resources include ideas, activities, tools, and lessons designed to enhance instruction and supplement curriculum within K-12 classrooms.

Professional Learning Resources

Professional Learning Resources focus on educator professional development, mentoring, and coaching, and have utility in professional learning communities.

Playlist Resources

Playlists are collections of Digital Library resources that all focus on the same or similar content, and are organized into progressions of skills or understanding.

OVERVIEW

A Balanced Assessment System

Information and tools to support teaching and learning

DIGITAL LIBRARY

80%

formative

An online collection of thousands of educator-created classroom tools and resources

INTERIM ASSESSMENTS 15%

Optional and flexible tests given throughout the year to help teachers monitor student progress

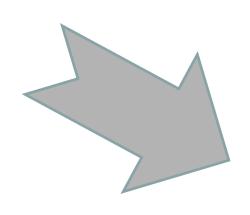

SUMMATIVE ASSESSMENTS

5%

Year-end assessments for grades 3–8 and 11 with a computer adaptive test and performance tasks in math and English

Standards

Through the Assessment

Because...this is where change happens

This system was designed to support teachers to facilitate student mastery of state standards.

ISAT assessment system: The Digital Library Learning goals for today's webinar

- 1. Understand concepts of 'formative assessment'
- 2. Know facts and how to use the Digital Library
- 3. Understand how the Digital Library is aligned to other parts of the ISAT system

The case for student involvement and confidence

"If our students are convinced they can be successful – if they have the self-efficacy – they are likely to try harder and persist longer when they face obstacles. Confident students believe they can eventually learn anything. They will try harder and persist longer because they have what Kanter calls a *grounded optimism*; their confidence is based upon a track record of success and not simply an inflated level of false hope."

Tom Schimmer

Understand concepts of 'formative assessment'

The Formative Assessment Process

The Smarter Balanced Assessment Consortium is an organization of member states committed to providing tools and resources that support teaching and tearning. The three core components of the Smarter Balanced Assessment System are summative assessments, interim assessments, and formative assessment practices.

Formative Assessment is a deliberate process used by teachers and students during instruction that provides antiquable fourthank (mark to artifices noticing teaching and teaching and teaching attraction that Formative Assessment is a deliberate process used by teachers and students during instruction that provides actionable feedback used to adjust ongoing teaching and learning strategies to improve students' attainment of curricular learning targets/goals.

There are four attributes in the Formative Assessment Process, represented graphically as a clover; Clarify intended learning Elicit evidence

- Interpret evidence Act on evidence

Two important components of clarifying intended learning, the first attribute of the Formative Assessment process, are learning goals and success criteria. I earning goals shall what shurfands will know but the good of Two important components of clarifying intended learning, the first attribute of the Formative Assessment Process, are learning goals and success criteria. Learning goals state what students will know by the end of the lesson. They describe 'big loas' or concepts that are transferable and reflect with the lesson that the transferable and reflect with the common state. I arrain analysis are written in student-friendly language. I beginned with "Jundentary III." the tesson. They describe "big ideas" or concepts that are transferable and reflect the intent of the Common Core State Standards. Learning goals are written in student-friendly language, beginning with, "I understand." Surpass critical define the evidence that teachers and students use by distancing how students. Core state standards. Learning goals are written in student-mendly language, beginning with, if und Successor cities define the evidence that teachers and students use to determine how students are Successor through the fearning shale. They are also switten in student-friends languages but beeing use the beeing the students are successor. Success criteria define the evidence that teachers and students use to determine now students are progressing toward the learning goals. They are also written in student-friendly language, but begin with 7 can.

The second attribute of the Formative Assessment Process, eliciting evidence, provides the information to an activity and abundance are in their runnymes travard the infended learning The second attribute of the Formative Assessment Process, **eliciting evidence**, provides the information teachers and students need to determine where students are in their progress foward the intended learning. The evidence should be tightly aligned to the learning goals and is defined by scores criteria. Experts as upper that teachers and students consider student needs inforests, and learning sides when Advivers has The evidence should be lightly aligned to the learning goals and is defined by the success criteria. Experts suggest that teachers and students consider student needs, interests, and learning styles when deciding how the success criteria. We also suppress mat reachers and suppress consider students recess, interests, and rearring styres when declared to elicit evidence so that students have a choice of different ways to meet the success criteria. It's also industrial to the mutual operation about a trivate burner about a trivate burner about a trivate burner and address to the appropriate property and a suppression of the success of the suppression about a trivate burner about a trivate burner about a trivate burner. to entat evidence so that students have a choice or otherent ways to meet the success criteria, it is an important to use multiple sources of evidence to draw accurate conclusions about student learning.

Teachers and students interpret the evidence they collect to determine where students are in relation to the laming goals and suppose ordinal identifican what students understand and don't use understand. Charlester Teachers and students interpret the evidence they collect to determine where students are in relation to the learning goals and success criteria, identifying what students understand and don't yet understand. Students can independ an analysis and the collection of their roun fearuring though they handle from sharing and riservisions. learning goals and success criteria, identifying what students understand and don't yet understand. Students can independently analyze evidence of their own learning, though they benefit from sharing and discussing their interruptations, with biaschare and nears. Through paraeful analysis of the autriance, learnings and nears. can independently analyze evidence of their own learning, though they benefit from sharing and discussing their interpretations with teachers and peers. Through careful analysis of the evidence, teachers and peers are sense, and their interpretations with the control of the c their interpretations with teachers and peers. Through careful analysis or the evidence, teachers and peers able to provide actionable feedback. It is important to note that interpreting evidence is not a single event. auns to provide accordance recourse. It is important to note that interpreting evidence is not a single ever Rather, evidence is interpreted in the Formative Assessment Process on an ongoing basis throughout

In the Formative Assessment Process, acting on evidence comes after teachers and students have clarified the fearning and abstract and interrested audience of the learning Once the audience is interrusted teachers. In the Formative Assessment Process, acting on evidence comes after teachers and students have clarified the learning and elicited and interpreted evidence of the learning. Once the evidence is interpreted, teachers and students use actionable feedback to determine next steps to continue to move Bearing forward. The steps are not to the came for all existents and must take into resistance and the came for all existents. and students use actionable teedback to determine next steps to continue to move learning forward. The steps may not be the same for all students and must take into consideration each student's readiness, interests, and

What is the formative assessment process and what does the Digital Library have to do with it?

The Formative Assessment Process and the Digital Library

Formative assessment is a **deliberate process** used by teachers and students **during instruction** that provides **actionable feedback** that is used to **adjust** ongoing teaching and learning strategies to improve students' attainment of curricular learning targets/goals. There are four attributes in the Formative Assessment Process:

- Clarify intended learning
- Flicit evidence
- Interpret evidence
- Act on evidence

The Formative Assessment Process

The Smarter Balanced Assessment Consortium is an organization of member states committed to providing tools and resources that support teaching and learning. The three core components of the Smarter Balanced Assessment System are summative assessments, interim assessments, and formative assessment practices.

Formative Assessment is a **deliberate process** used by **teachers and students during instruction** that provides actionable feedback used to **adjust ongoing teaching and learning strategies** to improve students' attainment of curricular learning targets/goals.

There are four attributes in the Formative Assessment Process, represented graphically as a clover:

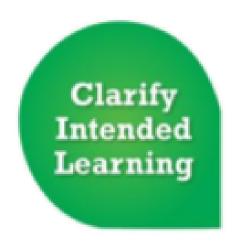

- Clarify intended learning
- Elicit evidence
- Interpret evidence
- Act on evidence

Two important components of **clarifying intended learning**, the first attribute of the Formative Assessment Process, are learning goals and success criteria. Learning goals state what students will know by the end of the lesson. They describe "big ideas" or concepts that are transferable and reflect the intent of the Common Core State Standards. Learning goals are written in student-friendly language, beginning with, "I understand." Success criteria define the evidence that teachers and students use to determine how students are progressing toward the learning goals. They are also written in student-friendly language, but begin with "I can."

The second attribute of the Formative Assessment Process, **eliciting evidence**, provides the information teachers and students need to determine where students are in their progress toward the intended learning. The evidence should be tightly aligned to the learning goals and is defined by the success criteria. Experts suggest that teachers and students consider student needs, interests, and learning styles when deciding how

What is the formative assessment process?

Claim 2: Writing W.3.3c
Use temporal words and phrases to signal event order

Assessment Target: Write or revise one or more paragraphes demonstrating specific narrative strategies....Use a variety of transitional words and phrases to manage the sequence of events.

<u>Learning Goal:</u> (What you need to know)

Today we will learn about words that help us to understand a sequence or order of events

Success Criteria: (How we know you know this)

To demonstrate understanding you'll write a short paragraph about an event that uses these words to show the order that actions happened.

What is the formative assessment process?

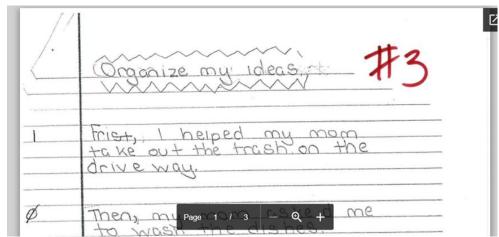

Evidence of learning:

- Takes a variety of formats
- Takes into account Depth of Knowledge

Understanding The Formative Assessment Process

Facts and usage of the Digital Library

What is the Digital Library?

The Digital Library is an online collection of high-quality instructional and professional learning resources contributed by educators for educators. Resources ...

- are aligned with the intent of the Idaho Content Standards
- help educators implement the formative assessment process to improve teaching and learning.

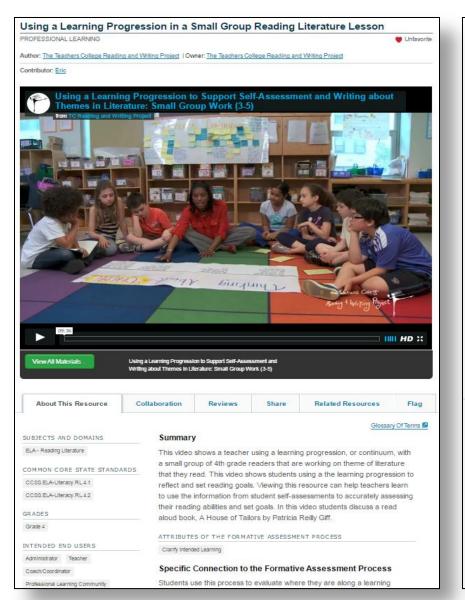

Educators can use the materials to:

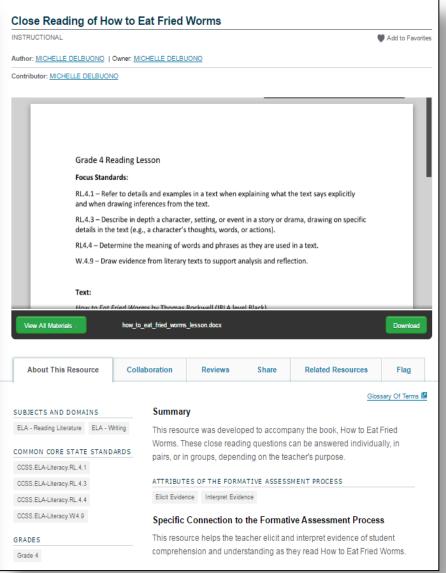

- Engage in Professional Learning Communities
- Differentiate instruction for diverse learners
- Engage students in their own learning
- Improve assessment literacy
- Design professional development opportunities
- Collaborate, comment on and rate resources and share their expertise with colleagues across the country in online discussion forums.

Professional Learning

Instructional

Digital Library Facts

- Instructional, professional learning, and playlist resources
- 100 multi-media modules for ELA/literacy and math instruction
- State of the art tagging, filtering, search features
- Online discussion, collaboration features and resource ratings
- Contributed and reviewed by teachers
- All resources aligned to formative assessment process
- Grades K-12; ELA/literacy, Math, Science, Social Studies, more
- Save to Favorites
- Alignment to Interim and Summative assessments

Recent Announcements

Reporting System (ORS) is now live! Users will ccess this system via the ELA/Literacy & Math s, Science & End of Course Assessments, and

Alternate Assessments cards found on the home page. As a reminder, Participation Reports will not be available through ORS during the 2016-17 administration. These will now be available through TIDE. ORS will continue to offer Score Reports and Retrieve Student Results data. Added August 19, 2016

· The Test Delivery System (TDS) is now available on the portal! The Interims (ICAs and IABs) Test Administration, the Assessment Viewing Application (AVA), and the Teacher Hand Scoring System (THSS) cards can be accessed via the ELA/Literacy and Math Assessments icon found on the home page. The Practice & Training Tests can be accessed via the icons found on the home page, under Students & Families and ELA/Literacy & Math Assessments.

A new announcement will be posted when the updated 2016-17 Test Delivery System Test Administrator (TA) user guide is available. In the meantime, there is a Test Administration Quick Guide available in the ELA/Literacy & Math Assessments Resources section under the subfolder AIR Online Systems - User Guides.

Please be aware there will be no Test Administration icons for Science & End of Course and Alternate Assessments until these tests go live. Please refer to the Important Dates section for specific go-live dates.

Added August 18, 2016

 The 2016-17 TA Certification Course is now available on the portal. The TA Certification can be accessed via the icon found under the ELA/Literacy & Math Assessments. Science & End of Course Assessments, or Alternate Assessment ELA & Math pages. This course is mandatory

Welcomel

This site demonstrates the features that are available on the portals created by AIR to access the assessment systems.

Teacher Scoring Application

Teachers will be able to apply to assist with scoring spring 2017 Summative Assessments later this winter. We will provide more information as soon as the application process becomes available. When applying, teachers who have had experience hand scoring interim assessment items should indicate this on their application.

disciplines.

standards: RL-1, RL-4, L-4, L-4a, L-4b, L-4c, L-4d, L-5c

(DOK 1, DOK 2)

- RL-1 Ask and <u>answer questions to</u> demonstrate understanding of a <u>text</u>, referring explicitly to the text as the basis for the answers.
- RL-4 Determine the meaning of words and phrases as they are used in a text, distinguishing literal from non-literal language.
- 4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 3 reading and content, choosing flexibly from a range of strategies.
- -4a <u>Use sentence-level context as a</u> clue to the meaning of a word or phrase
- -4b Determine the meaning of the new word formed when a known

Target 3. WORD MEANINGS:
Determine intended meanings of
words, including words with
multiple meanings (academic/tier
2 words, based on context, word
adonships (e.g., antonyms,
synonyms), word structure (e.g.,
common Greek or Latin roots,
affixes), or use of reference
materials (e.g., dictionary), with
primary focus on determining
meaning based on context and the
academic (tier 2) vocabulary
common to complex texts in all
disciplines.

Gr. 4 Standards: RL-1, RL-4, L-4, L-4a, L-4b, L-4c, L-5c (DOK 1, DOK 2)

- RL-1 Refer to details and examples in a text when explaining what the text says explicitly and when drawing inferences from the text.
- RL-4 Determine the meaning of words and phrases as they are used in a text, including those that allude to significant characters found in mythology (e.g., Herculean).
- L-4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 4 reading and content, choosing flexibly from a range of strategies.
- L-4a Use context (e.g., definitions, examples, or restatements in text) as a clue to the meaning of a word

Target 3. WORD MEANINGS: Determine intended or precise meanings of words, including words with multiple meanings (academic/tier 2 words), based on context, figurative language such as metaphors and similes, word relationships (e.g., antonyms, synonyms), word structure (e.g., common Greek or Latin roots, affixes), or use of reference materials (e.g., dictionary), with primary focus on determining meaning based on context and the academic (tier 2) vocabulary common to complex texts in all

Gr. 5 Standards: RL-1 , RL-4 , L-4, L-4a, L-4b, L-4c, L-5c (DOK 1, DOK 2)

- RL-1 Quote accurately from a text when explaining what the text says explicitly and when drawing inferences from the text.
- RL-4 <u>Determine the meaning of</u> words and phrases as they are <u>used in a text</u>, including figurative language such as metaphors and similes.
- L-4 Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on gradi 5 reading and content, choosing flexibly from a range of strategies.
- L-4a Use context (e.g., cause/effect

Operations and Algebraic Thinking

3.0A

Represent and solve problems involving multiplication and division.

- Interpret products of whole numbers, e.g., interpret 5 x 7 as the total number of objects in 5 groups of 7 objects each. For example, describe a context in which a total number of objects can be expressed as 5 x 7.
- 2. Interpret whole-number quotients of whole numbers, e.g., interpret 56 + 8 as the number of objects in each share when 56 objects are partitioned equally into 8 shares, or as a number of shares when 56 objects are partitioned into equal shares of 8 objects each. For example, describe a context in which a number of shares or a number of groups can be expressed as 56 + 8.
- Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.¹
- Determine the unknown whole number in a multiplication or division equation relating three whole numbers. For arample, determine the unknown number that makes the equation true in each of the equations 8 x? = 48, 5 = [] +3, 6 x 6 = ?

Understand properties of multiplication and the relationship between multiplication and division.

- 5. Apply properties of operations as strategies to multiply and divide.³ Examples: If 6 \times 4 = 24 is known, then 4 \times 6 = 24 is also known. (Commutative property of multiplication.) $3 \times 5 \times 2 \times 2 \times 10^{-3}$ as 5×10^{-3} and 5×10^{-3}
- Understand division as an unknown-factor problem. For example, find 32 + 8 by finding the number that makes 32 when multiplied by 8.

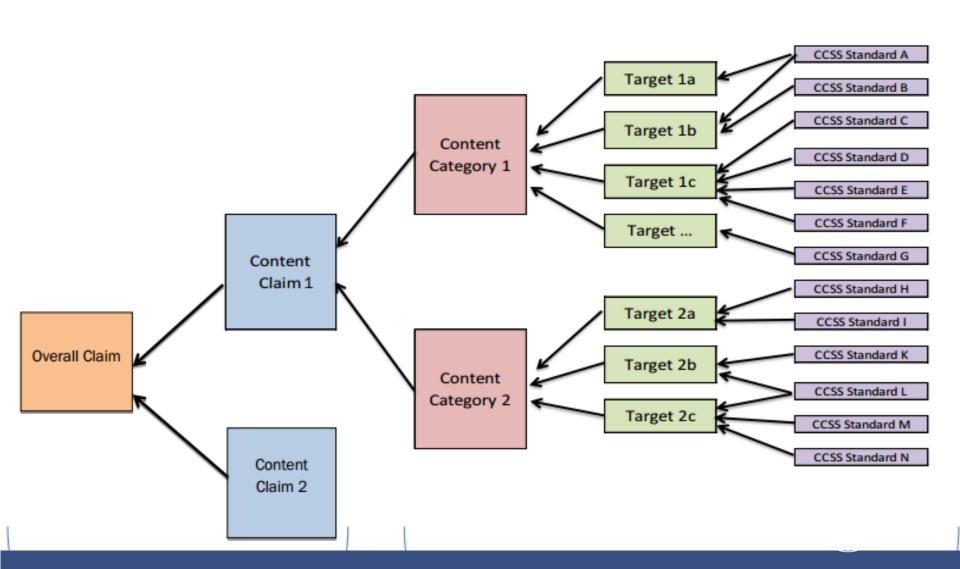

Multiply and divide within 100.

Fluently multiply and divide within 100, using strategies such as the
relationship between multiplication and division (e.g., knowing that 8 x
5 = 40, one knows 40 + 5 = 8) or properties of operations. By the end
of Grade 3, know from memory all products of two one-digit numbers.

Solve problems involving the four operations, and identify and explain patterns in arithmetic.

- Solve two-step word problems using the four operations. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.³
- Identify arithmetic patterns (including patterns in the addition table or multiplication table), and explain from using properties of operations. For example, observe that 4 times a number is always even, and explain why 4 times a number can be decomposed into two equal addards.

- endings/conclusions that provide resolution and/or reflect the content, and/or provide implications or significance of texts.
- · transitional strategies that provide cohesion in texts.

Educator-recommended next-steps

Instructional next steps for ORGAN exemplar/mentor texts to help stud

- · how authors begin narratives, or ir including when/how ideas/theses/ example: Thesis Statement CBA Handbook
- . how authors finish narratives by pr conclude explanatory/argumentative text by extending beyond the essay/assignment and following logically from the ideas/theses/claims made and supporting them with details/evidence (e.g., significance, next steps); Digital Library example: Responding to Arguments in Famous Public
- · how authors use transitional strategies to connect narrative elements/ideas, or advance theses/arguments, enhancing cohesion and clarity.

ELABORATING narrative and explanatory/ argumentative texts by identifying

Instructional next steps for ELABORATION include using more complex exemplar/mentor texts to help students REVISE after analyzing and

BELOW STANDARD

Students are working to solidify the following skills:

ORGANIZING narrative and explanatory/argumentative texts by identifying

- beginnings/introductions that introduce narrative elements (e.g., character, setting, conflict) and ideas or provide basic theses/claims in straightforward texts;
- endings/conclusions that provide some resolution and/or reflection, or connect to (and may summarize) straightforward texts;

· appropriate details (including sensory language and

development, turning point, conflict, etc.) in

dialogue) that develop story elements (e.g., character

· transitional strategies that provide some basic connections between and among elements

ELABORATING narrative and explanatory/

· appropriate details/evidence to develop

argumentative texts by identifying

straightforward narratives.

ideas/theses/claims in texts

Instructional next steps for ELABORATION include using exemplar/mentor texts to help students REVISE after analyzing and evaluating

 how authors incorporate descriptive/sensory details and dialogue in narrative texts:

Draft to Proclamation and How to Write a Thesis Statement

conflict resolution that may include reflection, or conclude

Instructional next steps for ORGANIZATION include using exemplar/ mentor

· how authors begin narratives and introduce narrative elements, or introduce

texts, and how authors introduce and set the context for theses/claims:

how authors finish narratives by providing a sense of completeness and/or

explanatory/argumentative texts by writing conclusions that go beyond

summary and follow logically from the ideas/theses/claims made and

· how authors use transitional strategies beyond simple words/phrases to

explanatory/argumentative text, including identifying strong theses/claims in

Digital Library examples: The Declaration of Independence: From Rough

· how authors choose and develop sufficient appropriate details/evidence to support ideas/theses/claims (for argument, address counterclaims).

Digital Library examples:

connect ideas.

supporting details/evidence;

- Graphic Organizer Expository Analysis
- Graphic Organizer for Argument Analysis
- Teaching the Parts of an Argument to Students

Professional Development Resources for teachers of students at all levels:

Teaching Opinion/Argumentative Essays Aligned with Common Core

Interim Assessment: An integral and important component of the assessment system

A Balanced Assessment System

With online assessments that measure students' progress toward college and career readiness, Smarter's comprehensive system gives educators information and tools to improve teaching and learning.

DIGITAL LIBRARY

An online collection of thousands of educator-created classroom tools and resources

INTERIM ASSESSMENTS

Optional and flexible tests given throughout the year to help teachers monitor student progress

SUMMATIVE ASSESSMENTS

Year-end assessments for grades 3–8 and high school with a computer adaptive test and performance tasks in math and English
